

HOLOMASK

EXTENDED REALITIES

Empowering your visions, building your worlds

AUGMENTED REALITY SYSTEMS

TEAMXR

Holomask, thanks to the TEAMXR software, works on the added value of extended reality solutions by offering the possibility to connect to a remote operator and see in real time exactly what he sees, send documents or draw on a virtual whiteboard, all displayed on the field of view of the remote operator.

HOW IT WORKS

YOU DON'T NEED TO BE ON SITE

TeamXR software gives the possibility of connecting remotely with an operator with augmented reality solutions.

JOINT WORK & HANDS FREE

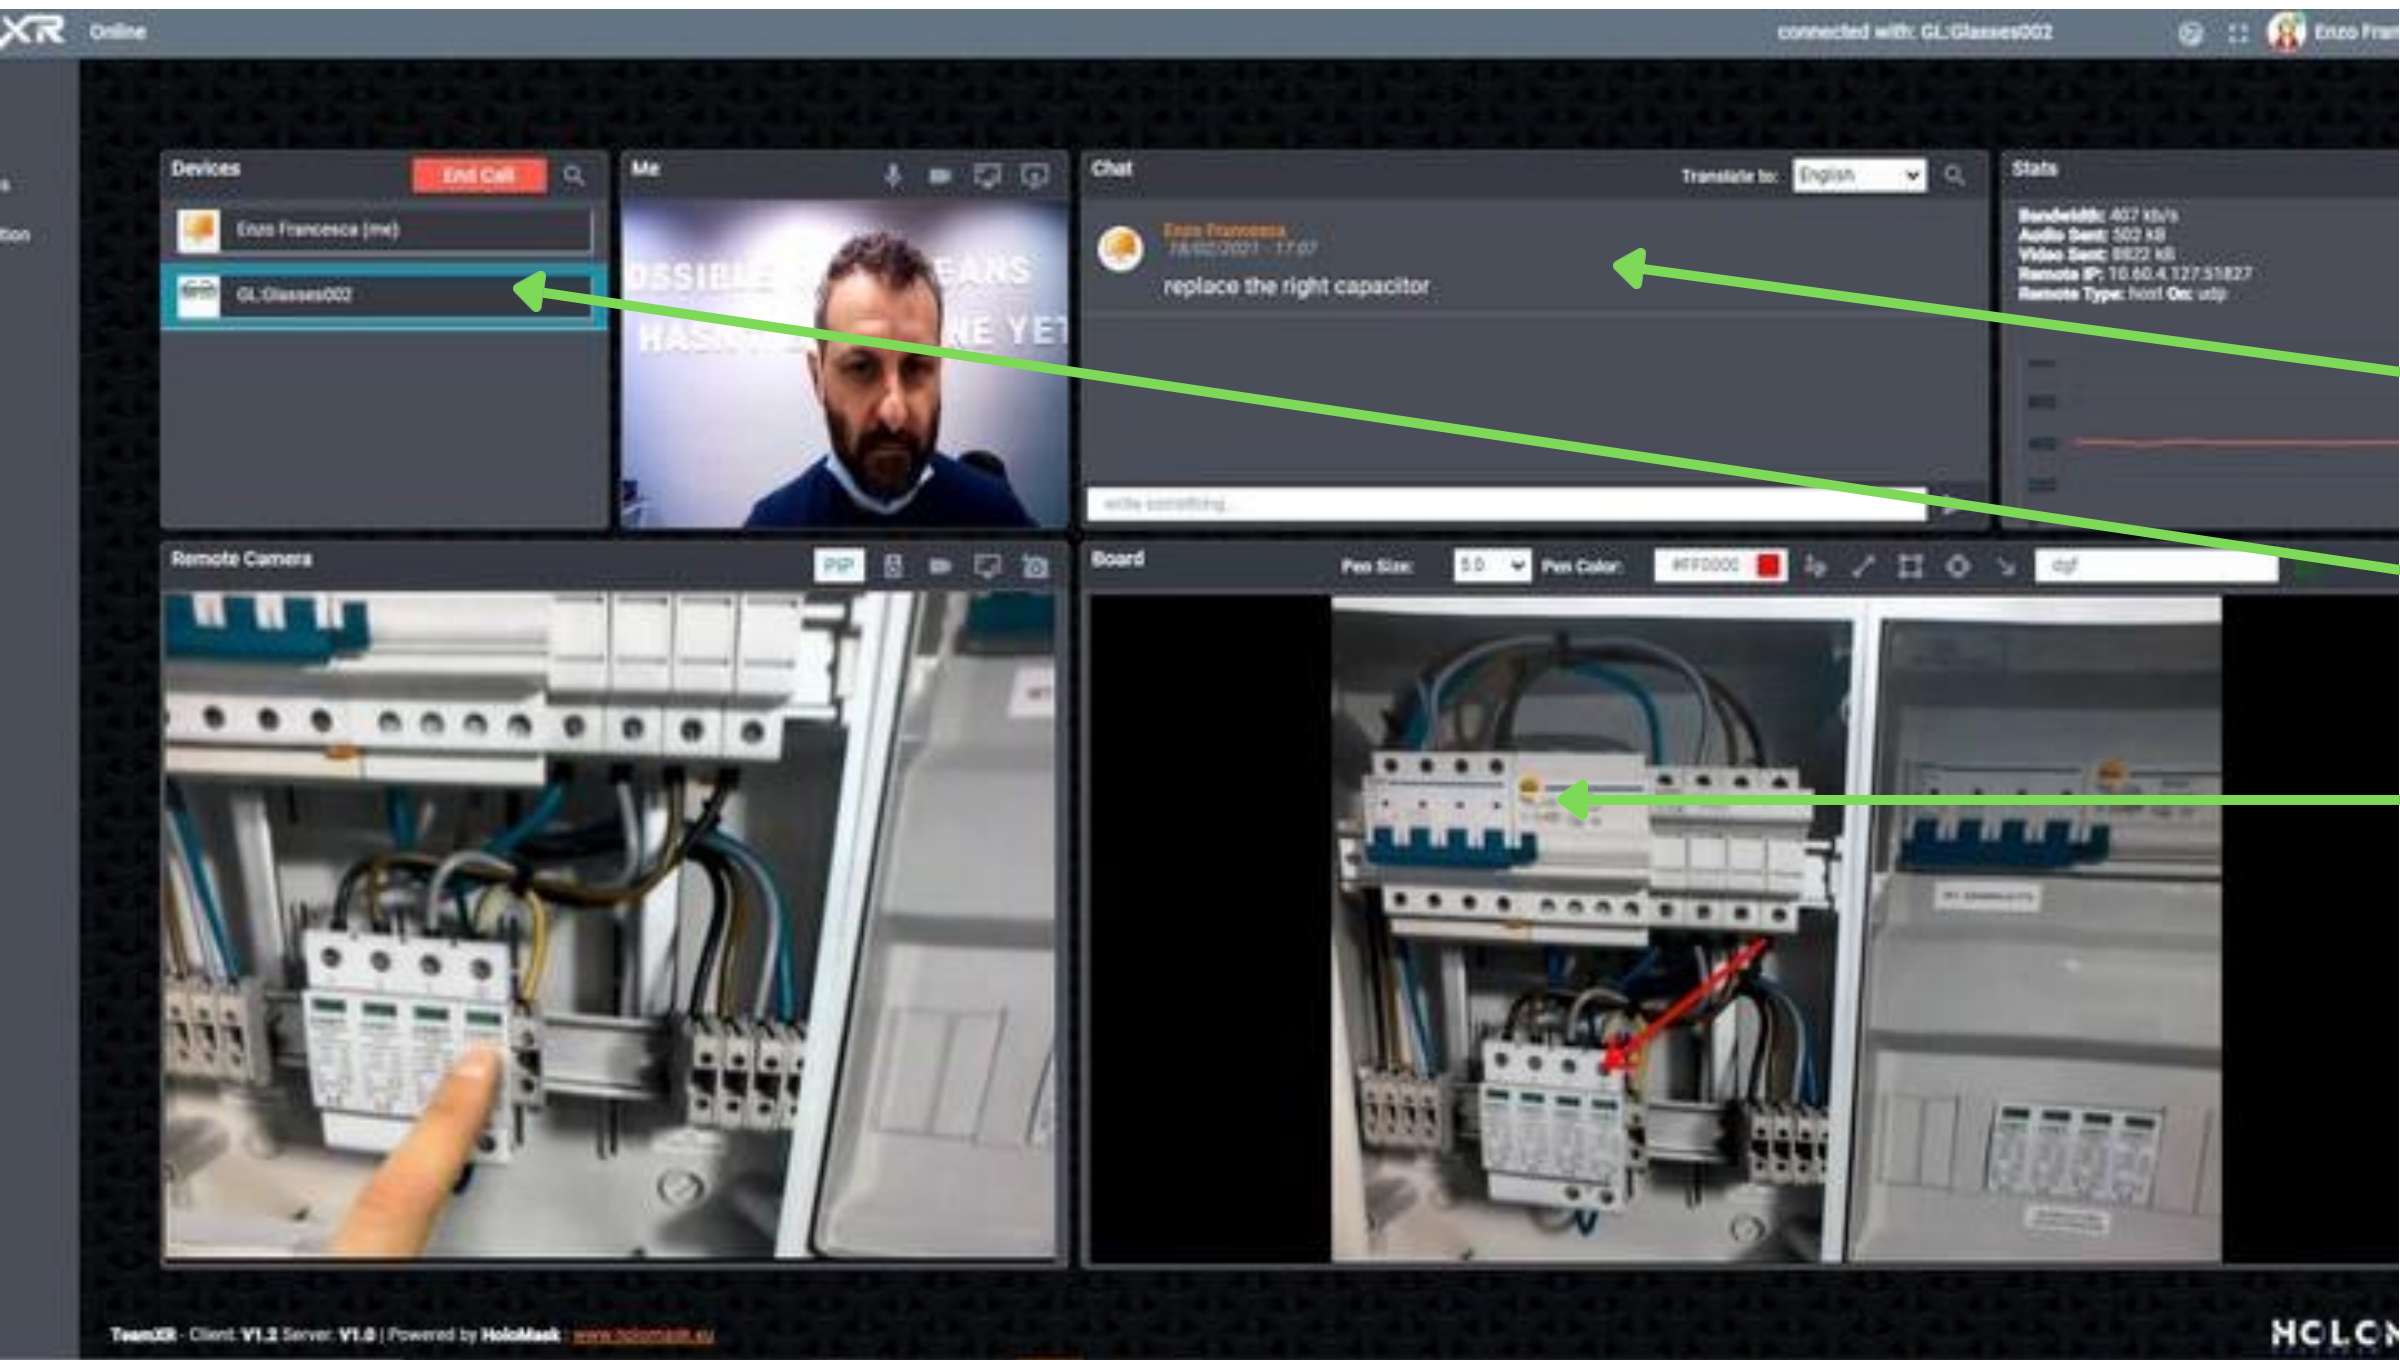

We see exactly what the operator sees onsite in real time.

The operator can operate hands-free.

DOCUMENTS AVAILABLE ON SITE

It is possible to send some documents or draw on a virtual board the images displayed on the field of view of the remote operator.

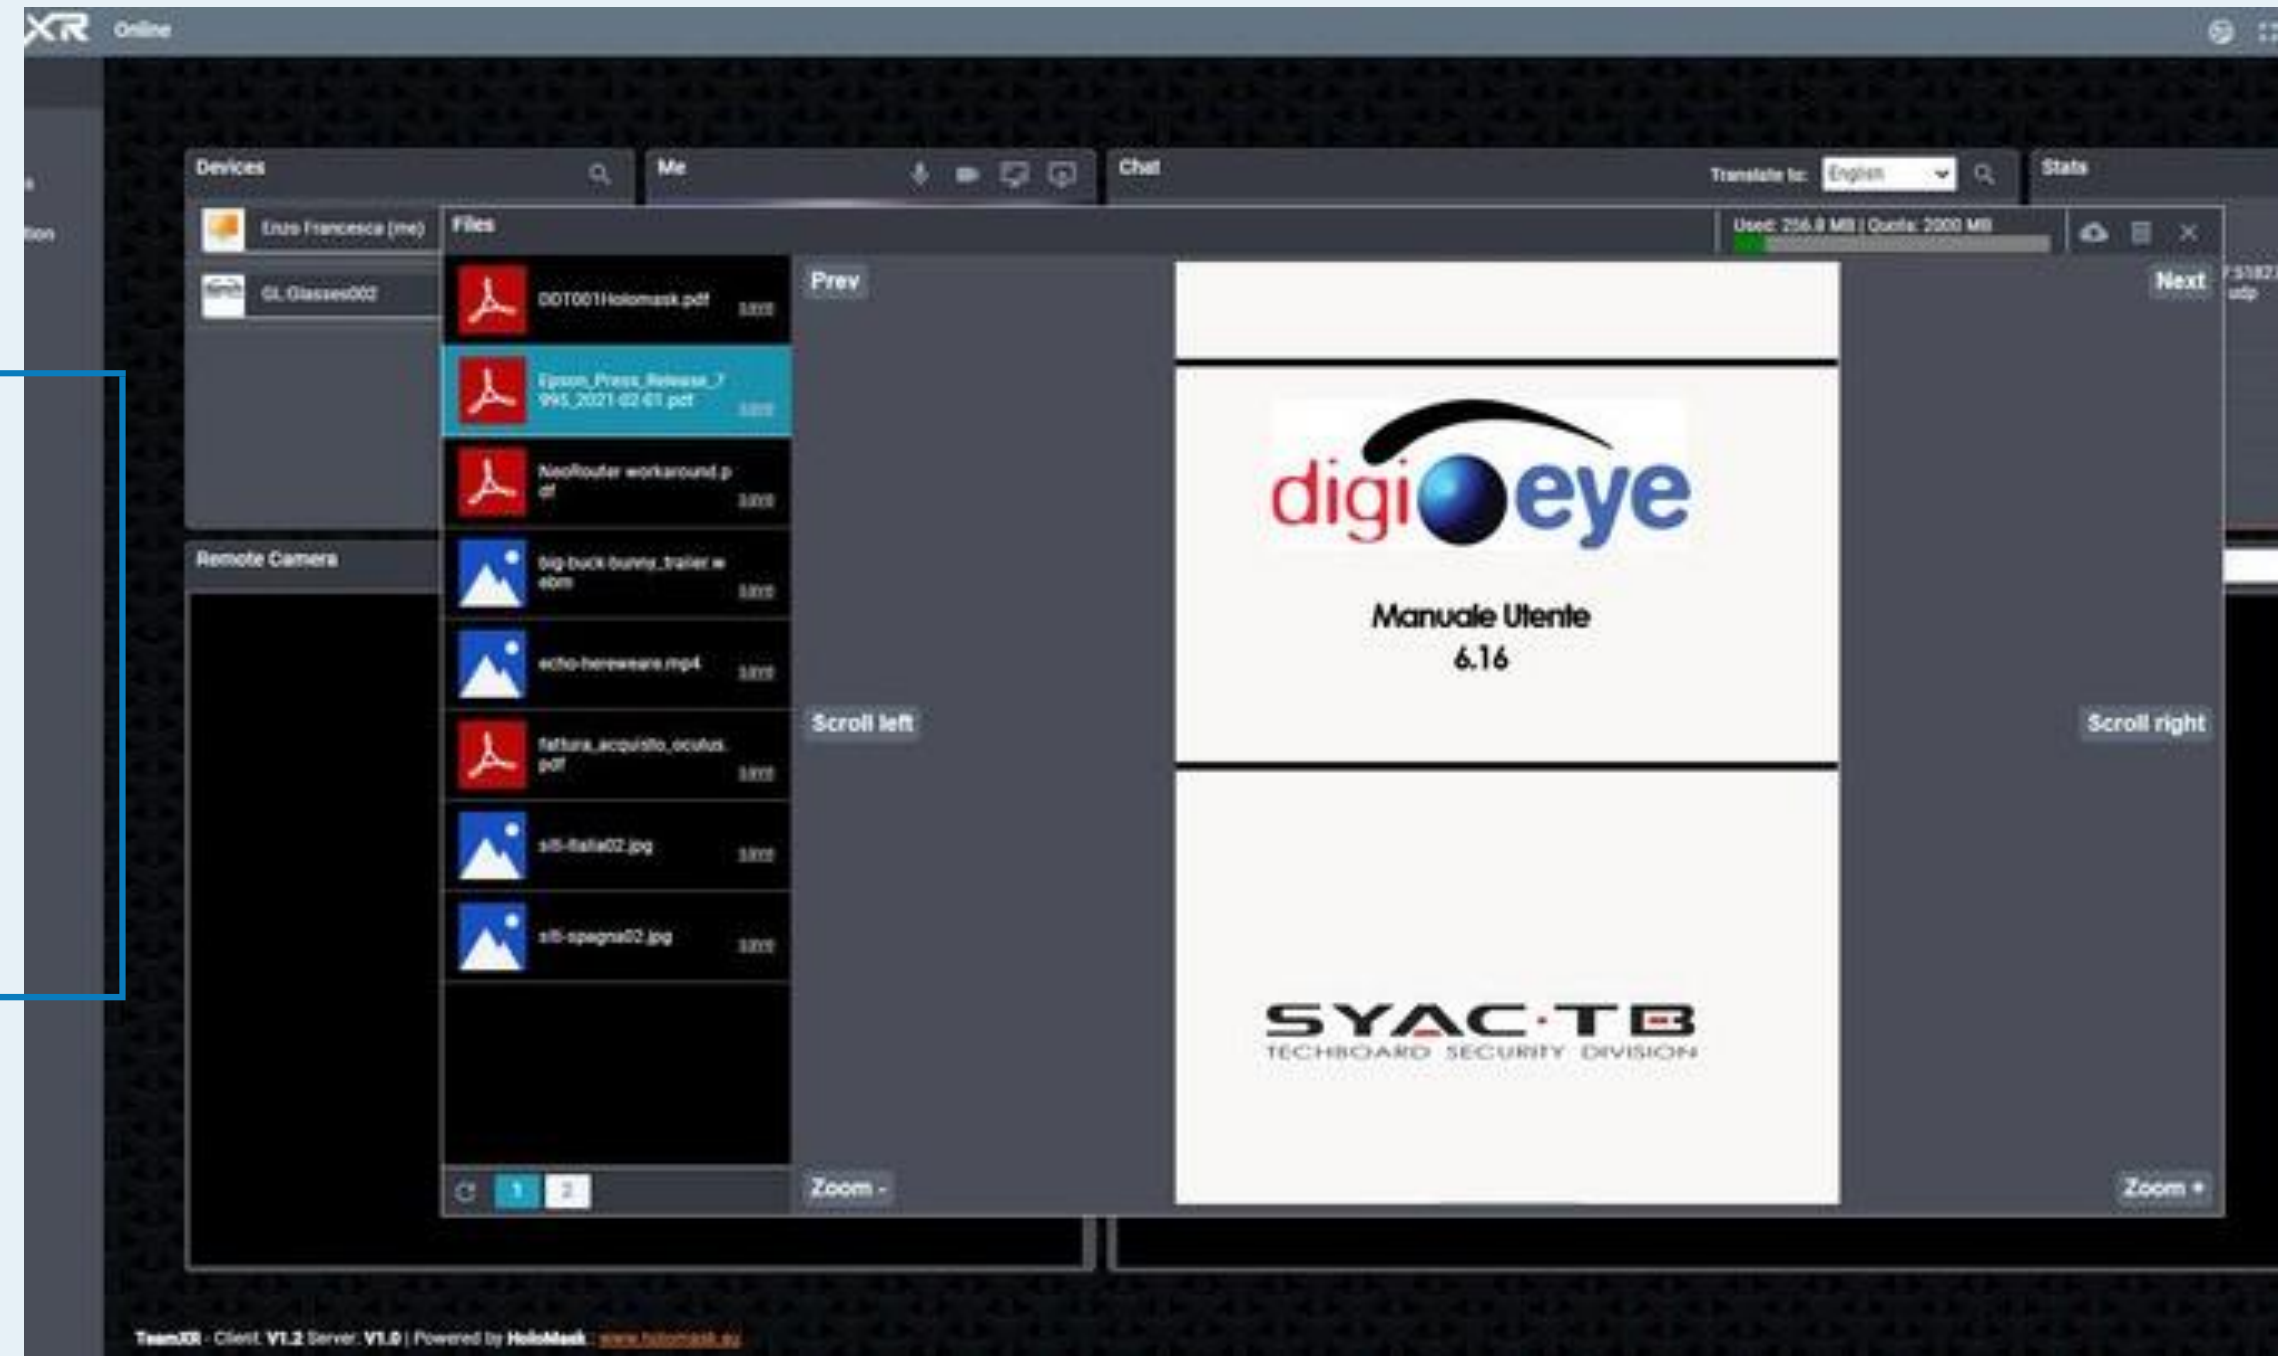

Multilingual translation of messages.

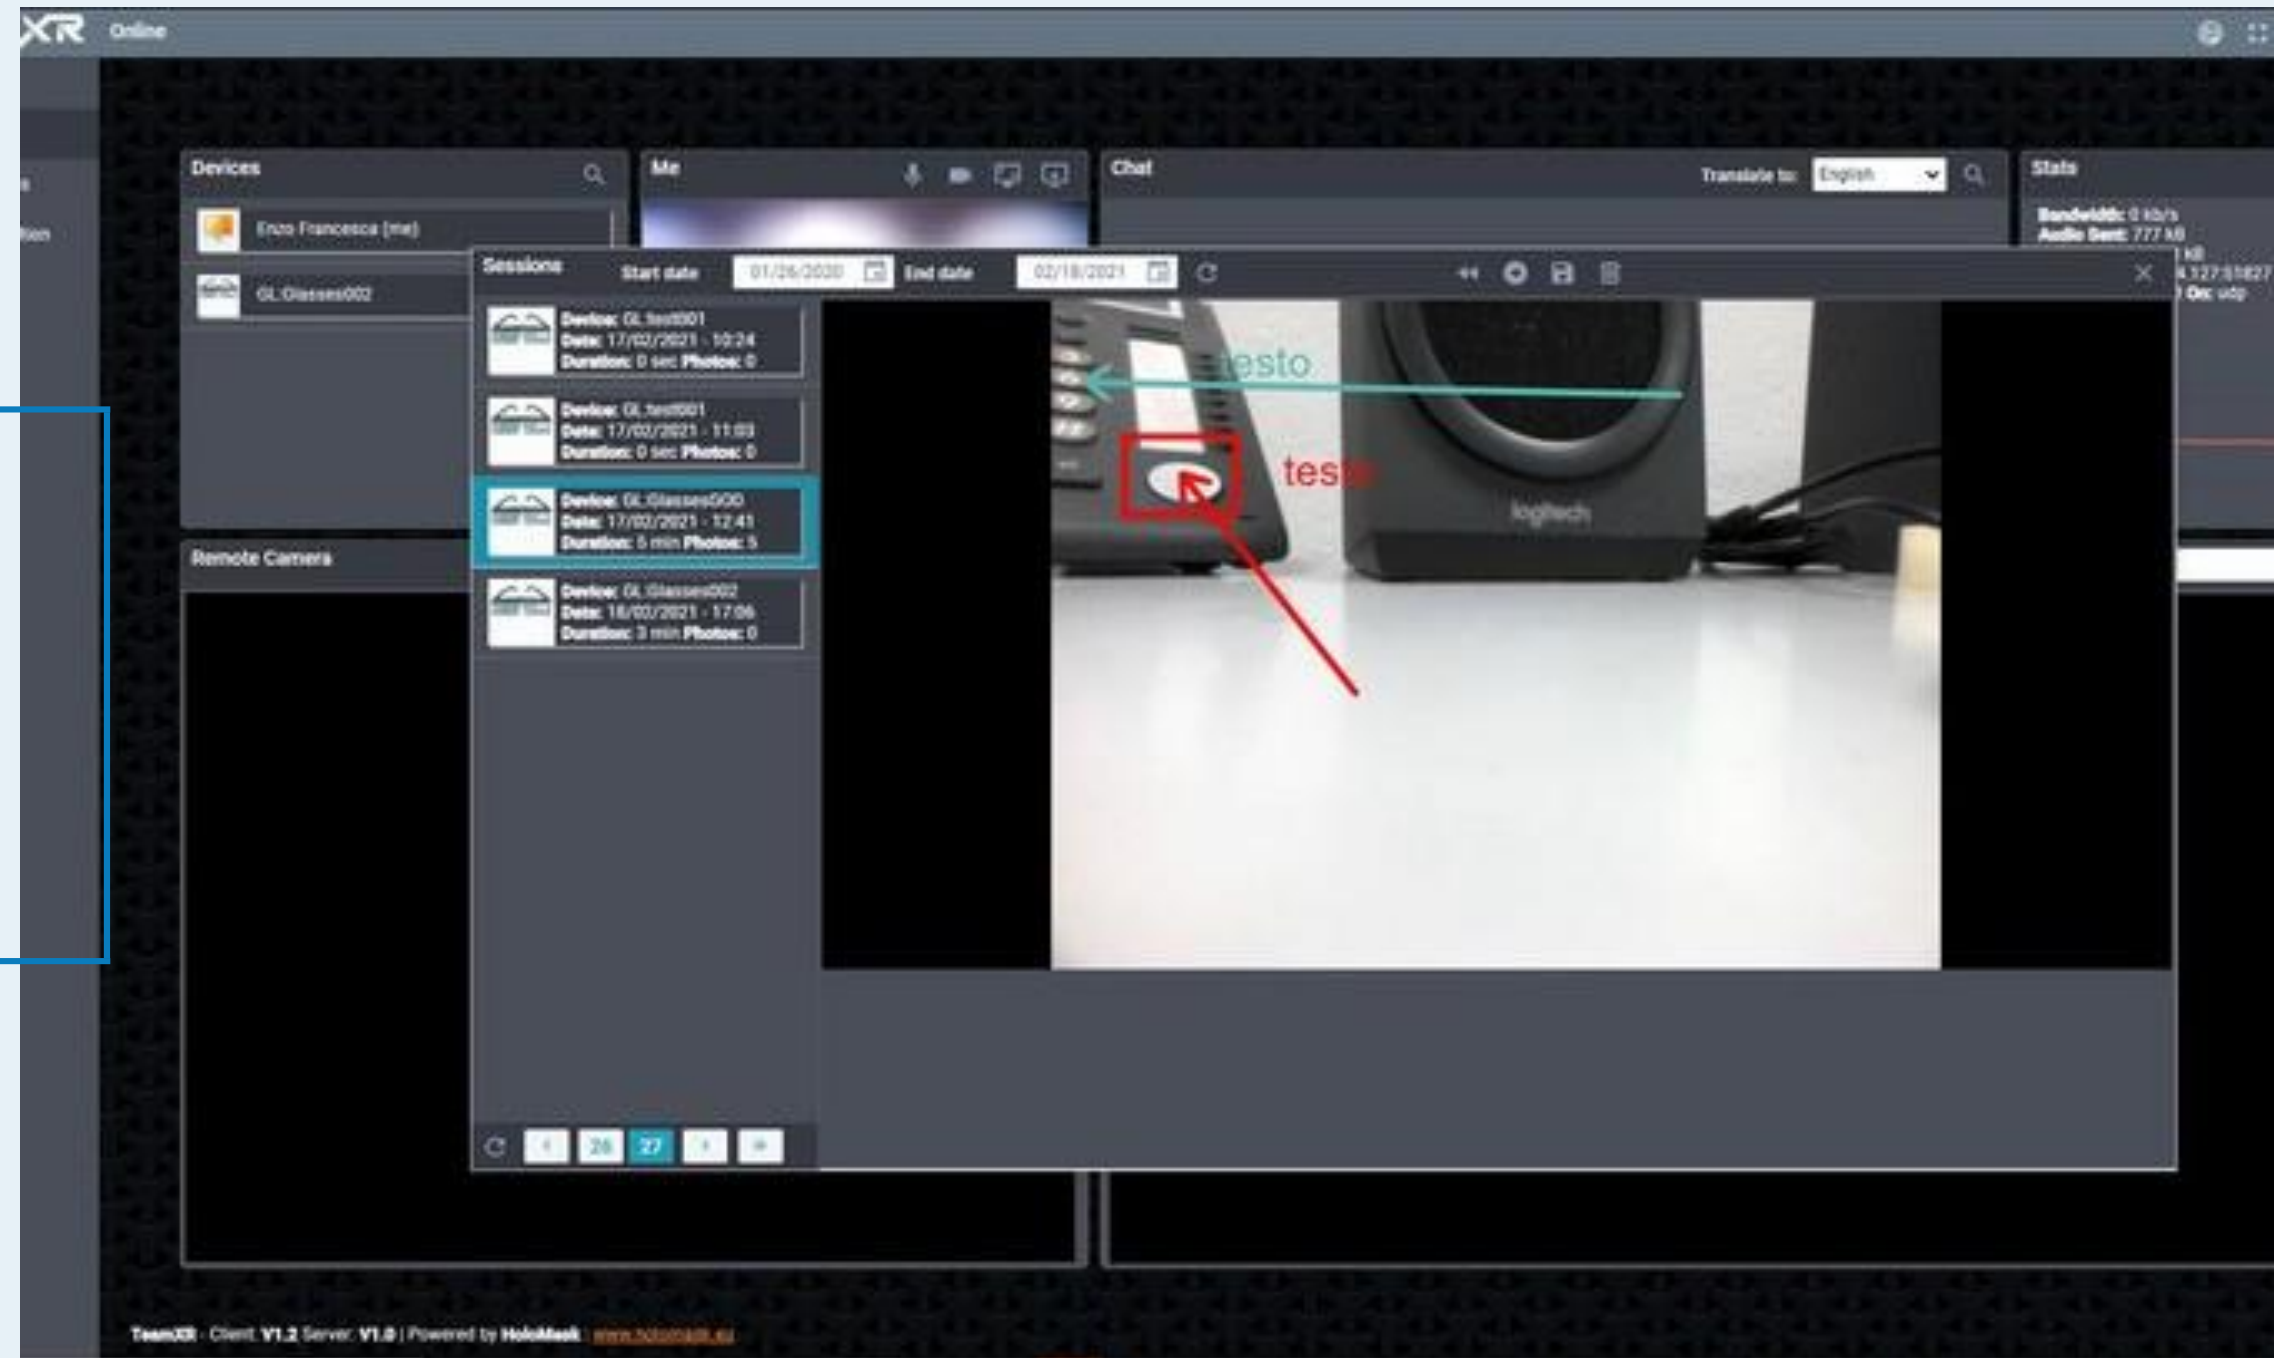

Quick and easy connection.

The expert operator can freeze a single frame from the video streaming coming from the remote glasses and draw on it.

The platform allows you to share documents, such as images, videos, PDFs and 3D files, with the remote user, which can be consulted directly from the glasses.

The platform allows you to save your sessions and review them later.

Our strength

The use of smart glasses, equipped with TEAM XR software, allows to assist technicians in performing complicated maintenance tasks by experienced personnel.

- **COMPLETE GOALS QUICKLY.**

Collaborate in real time with remote experts to complete difficult tasks faster and with fewer errors.

- **INCREASE PRODUCTIVITY**

Uses the most experienced resources to provide instructions in the field without travelling.

- **REDUCE TRANSFER TIMES AND COSTS**

Reduce re-working costs, travel costs and time, increasing customer satisfaction and solving problems from the first time.

- **JOB SECURITY**

Smart glasses allows you to carry out complex activities and receive all the desired information comfortably on the lenses, so as not to distract the technician from his work.

MAIN FEATURES

Chat One to One

Chat tool to communicate with remote technicians. All messages are archived in the current assistance session and can be recalled and saved.

Multilingual translation

Possibility of setting the source language and target language of the chat so the messages are automatically translated

Shared documents

Possibility of making documents (PDFs, Images, videos, 3D files) available in a cloud space shared with the glasses, in order to provide the operator in the field, the opportunity to consult documentation useful for the activity.

Encrypted communication

All audio / video content is AES256 End-To-End encrypted to avoid "man in the middle" hacking.
Access to the platform is via personal credentials.

ADDITIONAL BENEFITS

USE FROM THE BROWSER

The expert operator doesn't need to install any software, but he will access the solution via browser. All modern browser are supported, such as: Chrome, Firefox, Safari, Edge, Opera...

Thanks to the application being in cloud, updates are immediately available to the operator.

FROZEN IMAGE

The expert operator can freeze a single frame from the video streaming coming from the remote glasses and draw on it with lot of graphic tools integrated on the platform.

DESKTOP SHARING

The expert operator can share any page on his PC or Mac make it available in the field of view of the operator on field.

SMART GLASSES COMPATIBILITY

TEAMXR is adaptable to every need and according to the operating environment of use

SESSION RECORDING

The expert operator can record the intervention session, save it on the PC and use it for later analysis or to training other operators.

SHARING FILES IN CLOUD

The platform allows you to share documents, such as images, videos, PDFs and 3D files, with the remote user, which can be consulted directly from the glasses.

SESSIONS INFORMATIONS

Each assistance session is saved by keeping the intervention date, start time, end time and duration, and the customer with whom the session took place is also saved.

SAVING SESSIONS

Single session can be saved and exported as Zip file or PDF.

HIGHLIGHTS

For each single assistance session it's possible to review photos that have been exchanged, all graphic signs that have been affixed and also all the messages on chats that have been exchanged

Session Log

WHAT MAKES **TEAMXR** DIFFERENT FROM THE OTHERS?

Totally cloud platform, so the customer has not to install any additional SW.

Turnkey supply, we give smart glasses with the SW installed.

Customizable according to the requirements of the customer.

TEAM XR is adaptable to every need, depending on the environment operational in the field.
